Improved lifting lever for better ergonomics

AR30 + AR40 + AR60

NEW POSITION

The ball is now attached to the shaft with a solid thread to gain robustness and avoid glue attachment.

New design achieves:

- Use less force when raising the bowl (Law of the lever logic)
- Better ergonomic work position
- Bigger spacing between speed / lifting lever
- Shorter reach

AR30 + AR40:

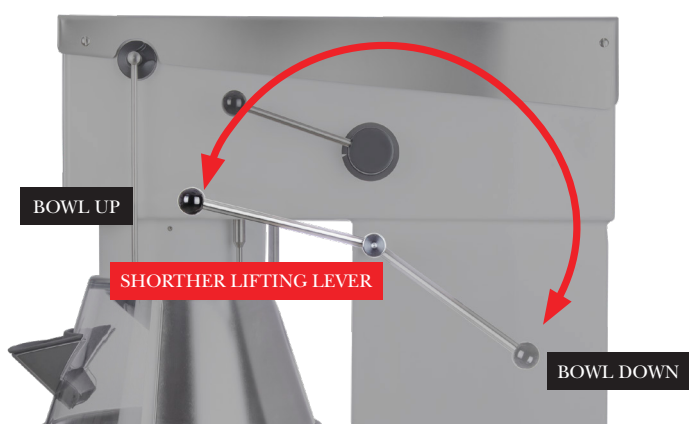

- Longer lifting lever (compared to earlier models)
- Different angle / position

AR60:

- Same lifting lever (compared to earlier model)
- Different angle / position

OLD POSITIONS

AR30 + AR40

AR60
